

The Secret of new 500 000 Graves in Sweden

In psychology, the easiest way to control people is by terrorizing them by promoting the idea that they will meet their fate of death.

From here came the idea of preparing 500,000 graves

Church of Sweden, in 2022, under the direct supervision of the Wallenberg family, a propaganda agenda was fixed to prepare public opinion about the need to prepare half a million graves.

This is an idea that would not even occur to Satan.

The idea is based on one of the principles of the secret organizations that founded the deep state.:

"Either you submit to the deep state, or your fate is death and graves"

Here I bring out a text translated from Swedish:

“The Church of Sweden looks over war graves for half a million people Updated March 2, 2023, Published March 2, 2023: If the war comes to Sweden, the church must be able to handle the number of victims to be buried. Church pastors across the country have been tasked with raising preparedness, and the church advises congregations to plan grave sites for a total of five percent of Sweden's population.

Just before Christmas, the bishop sent out a letter to all parish priests, calling for the church to prepare for a possible war or crisis situation. The pastors must ensure that the funeral business can function even if the energy supply, internet, and telephony disappear.”

The announcement is clear and it is about war, of course the war with Russia. As we mentioned before, the decision to go to war in Sweden is not in the hands of the government, the puppet government, but in the hands of the Wallenberg family. Participation in wars will increase the production of weapons factories owned by the Wallenberg family, while the financing of weapons production falls on the taxpayers.

The announcement of the Church of Sweden's meetings with the armed forces is not the whole truth.

The Church of Sweden held intensive talks with the Swedish armed forces and representatives from the arms factories during the autumn. Which was followed by the announcement of the Archbishop,

Just before Christmas, there was also a sharp call from Archbishop Martin Modéus to the country's other bishops to speed up the preparations for crisis and war in the country's 550 parishes, reports Aftonbladet today.

Press release funeral coordinator for the Church of Sweden

Eva Åbrandt Johansson, funeral coordinator for the Church of Sweden, says:

We start from a worst-case scenario in our recommendations, so we want to urge the congregations to think about it, she said.

Preparing half a million graves

In the event of a crisis or war, more deaths are inevitable. Then, the church must meet the need for more people to be buried.

It concerns just over half a million graves. In addition, collection points for corpses must be clearly marked near all cemeteries.

It is so that you can assign a huge number of deceased people there. Usually, there are premises for that. But it may be that it is not enough, says Eva Åbrandt Johansson

Crematoria may stop working:

This can cause significant problems in the crematoria, which means that the churches need to be prepared for "manual grave digging" instead

Priests and bishops in the Church of Sweden exposed the hidden

I have met many clergymen whom serve in the Church of Sweden

I have met many priests and bishops in the Church of Sweden, some of whom are in the closed circle that makes the decisions. They were surprised by this decision, and they stressed that Sweden does not need to prepare the huge number of cemeteries. They also stressed that this decision was imposed on the Church by the circle of arms manufacturers.

The clergymen confirmed that the meetings were held not only with the Swedish armed forces but also with representatives from the arms factories during the autumn. They confirmed that it was propaganda prepared in 2022. It's propaganda to seize tax money.
